

JAGANATH N

NodeJS Developer

Hosur | 9629794726 | jagan0200@gmail.com | [Linked In](#)

CAREER SUMMARY

With more than three years of solid experience, I'm a proficient NodeJS developer & Solution Analyst with excellent client management skills and a solid comprehension of the ReactJS framework.

SKILLS AND STRENGTHS

Tech Skills

Backend – NodeJS | ExpressJS | HapiJS | RESTful APIs
Frontend – ReactJS | HTML | CSS | Bootstrap
Programming Languages – JavaScript | TypeScript
Databases – MYSQL, MongoDB
Cloud – GCP (microservices debugging and deployment)
Management Tools – GIT, JIRA

Soft Skills

Communication | Problem Solving | Adaptability | Time Management | Client Relationship Management | Project Management | Teamwork & Collaboration

EXPERIENCES

Doodleblue Innovations Private Limited, NodeJS Developer

(Jan 2022 to Present) | **3.2 years**

Roles & Responsibilities: NodeJS Developer, Solution Analyst, Requirement analysis for the Client Requests, Client Handling and Supporting ReactJS Developer.

Doodleblue Innovations Private Limited, Full Stack Development Internship

(Sep to Dec 2021) | **4 months**

Roles & Responsibilities: Backend RESTful APIs development, ReactJS Developer, Database Administration.

TOP PROJECTS

Umobile | NodeJS Developer & Solution Analyst

Mobile Application services and Web CMS enhancement for Umobile telecommunication services.

- Developed a **Microservices Architecture and RESTful APIs** utilizing NodeJS (Hapi.js with JavaScript) as a middleware with an integration of MYSQL database to improve the application for various modules.
- Since this project follows the Agile methodology, I will also be involved in client management, requirement analysis, cost and effort estimation, and solution design on a regular basis.
- Writing scripts to generate reports from a large database and analyzing report data to enhance the application.
- Worked in several modules of Web Development using **ReactJS** to enhance the web CMS application.

CUBE84 | NodeJS Developer

Web applications development to manage cleaning and maintenance services in urban areas.

- Using NodeJS (Express with TypeScript) and a MySQL database, a comprehensive **reporting system** was designed and put into place to handle customer service data through RESTful APIs.
- Enhanced the application by optimizing **complex queries in MySQL** to generate reports from enormous volumes of data.
- Writing and optimizing scripts for data migrations.

CERTIFICATION

Edureka, Full Stack Web Development internship program

(Nov to Feb 2021) | **4 months**

Roles & Responsibilities: MERN stack developer, Learned and developed responsive web applications

EDUCATION

BE CSE, Graduation Year (2021), Loyola-ICAM College of Engineering and Technology, Chennai
