JAGANATH N

NodeJS Developer

Hosur | 9629794726 | jagan0200@gmail.com | LinkedIn

CAREER SUMMARY

Full Stack Developer with 4+ years of experience building scalable applications using Node.js (Hapi.js, Express.js) and React.js. Strong expertise in designing RESTful APIs, microservices architecture, and optimizing MySQL/MongoDB databases for high performance. Experienced in Agile environments, client communication, and delivering end-to-end efficient solutions.

SKILLS AND STRENGTHS

Tech Skills

Backend: NodeJS, ExpressJS, HapiJS, RESTful APIs
Frontend: ReactJS, HTML, CSS, Bootstrap
Programming Languages: JavaScript, TypeScript
Databases: MYSQL, MongoDB
Cloud & DevOps: GCP (microservices debugging and deployment)
Management Tools: GIT, JIRA, Postman
Concepts: OOP, MVC Architecture, Agile Methodology

Soft Skills

Problem Solving | Adaptability | Time Management | Client Relationship Management | Project Management| Communication | Teamwork & Collaboration

EXPERIENCES

Aspire Software, Software Engineer (May 2025 to Present) | **11 months**
Roles & Responsibilities: NodeJS Developer, Product Enhancement.

Doodleblue Innovations Private Limited, NodeJS Developer (Jan 2022 to April 2025) | **3 years 4 months**
Roles & Responsibilities: NodeJS Developer, Solution Analyst, Requirement analysis for the Client Requests, Client Handling and Supporting ReactJS Developer.

Doodleblue Innovations Private Limited, Full Stack Development Internship (Sep to Dec 2021) | **4 months**
Roles & Responsibilities: Backend RESTful APIs development, ReactJS Developer, Database Administration.

TOP PROJECTS

Woody | Software Engineer

MSI Application used for media (Video & Audio) encoding and decoding.

- Enhanced and upgraded the media transcoding application to support latest media specifications, improving compatibility and processing efficiency across multiple formats.
- Diagnosed and resolved complex production issues by debugging encoding/decoding workflows, reducing recurring customer-reported incidents and improving system stability.
- Collaborated with cross-functional teams to deliver timely fixes and performance improvements, ensuring high customer satisfaction and minimal downtime.

Umobile | NodeJS Developer & Solution Analyst

Mobile Application and Web CMS for Umobile telecommunication services.

- Architected microservices-based backend handling 4M+ daily users, improving scalability and reducing deployment dependency between modules.
- Since this project follows the Agile methodology, I will also be involved in client management, requirement analysis, cost and effort estimation, and solution design on a regular basis.
- Reduced report generation time by 40 to 50% through query optimization and script enhancement for large-scale databases.
- Contributed to Web CMS enhancements using React.js, improving user experience and reducing manual operational effort.

CUBE84 | NodeJS Developer

Web and mobile applications to manage cleaning and maintenance services in urban areas.

- Using NodeJS (Express with TypeScript) and a MySQL database, a comprehensive **reporting system** was designed and put into place to handle customer service data through RESTful APIs.
- Enhanced the application by optimizing **complex queries in MySQL** to generate reports from enormous volumes of data.
- Writing and optimizing scripts for data migrations.

CERTIFICATION

Edureka, Full Stack Web Development internship program (Nov to Feb 2021) | **4 months**

Roles & Responsibilities: MERN stack developer, Learned and developed responsive web applications

---

EDUCATION

BE CSE, Graduation Year (2021), Loyola-ICAM College of Engineering and Technology, Chennai
